

61. (Currently Amended) A non-transitory computer-readable recording medium recording multimedia contents data having-in the form of a data structure that represents operations as a chronological sequence managed by a schedule describing unit, which is processed in a data processing device that includes a reproducing unit for reproducing media data and an inputting unit for receiving an input operation from a user, said non-transitory computer-readable recording medium further comprises:

the schedule describing unit for managing time of effect of said media data that is reproduced in said reproducing unit of said data processing device and time of effect of said input operation that is received by said input unit, and which includes:

a reproduction describing unit for showing-reproducing the media data that is reproduced in said reproducing unit of said data processing device in accordance with said chronological sequence; and

an input operation describing unit for showing-an input-receiving a predetermined editing operation that is received by said inputting unit of said data processing device at a predetermined time in accordance with said chronological sequence and performing an editing process that corresponds to said input-predetermined editing operation; and

a schedule-describing unit for managing time of effect of said media data that is reproduced in said reproducing unit of said data processing device and time of effect of said input operation that is received by said input unit, wherein

said multimedia contents data is processed so that predetermined media data is reproduced in said reproducing unit of said data processing device at a predetermined time on the basis of said schedule describing unit, a predetermined input operation is received by said inputting unit of said data processing device at said predetermined time,

and said data processing device carries out a process that corresponds to said predetermined input operation at said predetermined time on the basis of said input

operation describing unit, and

said reproduction describing unit resuming processing of said multimedia contents in accordance with the chronological sequence.
